

tesa® Print Repro – Superior plate mounting solutions from tesa

Plate mounting in corrugated board postprint presents a unique set of challenges to the mounter, whether on-site or in an expert repro house. Printers' demands vary hugely, from solids to screens, and encompass a whole range of plate sizes, right up to the largest on the market.

Consequently, a tape must offer the ideal adhesive properties to ensure a secure and lasting bond with the Mylar sheet or cylinder, even on longer print runs at higher speeds, as well as during storage. Additionally, the tape must offer perfect handling properties for easy and secure tape application.

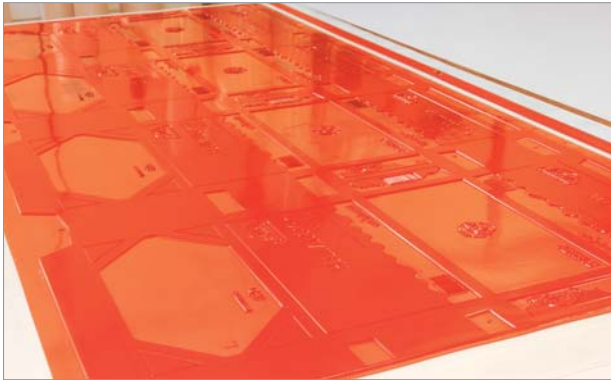

tesa® Print Repro solutions with filmic backings and siliconized, creped liners for easy release & air-free mounting.

tesa® Print Repro solutions deliver on every count. They offer reliable adhesive properties and a selection of thicknesses to suit individual needs. A variety of backings provide a tailored solution to the demands of every application and specially developed liners promote easy application, without the risk of air pockets.

tesa® print Repro

Product	Category	Color	Backing	Liner
tesa® 64602	100 µm	transparent	PVC film	siliconized, creped PP, easy-release, anti-air pockets
tesa® 64604	200 µm	transparent	PVC film	siliconized, creped PP, easy-release, anti-air pockets
tesa® 64606	300 µm	transparent	PVC film	siliconized, creped PP, easy-release, anti-air pockets
tesa® 52664	380 µm	white	fabric	silicone paper (yellow)
tesa® 64966	380 µm	white	fabric	stabilized silicone paper (white)
tesa® 52330	380 µm	white	fabric	creped paper

tesa® Print Repro offers optimal solutions for mounting all plate sizes, right up to the largest and thickest on the market.

tesa® Print Repro solutions provide an ideal, secure bond, even over prolonged periods of storage.
