

ROTOWASH – A success story

Adam_tabor@fujifilm.eu – September 2014

A print house in Eastern Europe is using our **ROTOWASH 60-1060** and has made the following statement:

*"For many months we are using a wash called **ROTOWASH 60-1060** produced by FUJIFILM Belgium NV.*

This wash we use with brush washing devices and on the presses with cloth washing devices. The use of this product allows us to reduce wash consumption and make the washing time shorter. Thanks to this we reduced the quantity of waste (emulsion of water and wash) and the quantity of cleaning cloth.

Thanks to the reduced quantity of chemicals we used, we also reduced cost of transport and storage of mentioned chemicals. Therefore the utilization cost is reduced too.

We recommend to use ROTOWASH 60-1060"
